

Job Posting Overview

The Job Postings Overview provides a snapshot of real-time job postings data for occupations mapped to the selected program. This section shows Unique Postings, Posting Intensity, the number of Employers Competing, and the Median Posting Duration. The unique posting count is the count of postings after the deduplication process has taken place. Posting Intensity is the ratio of total to unique (deduplicated) job postings. A higher-than-average posting intensity can mean that employers are putting more effort than normal into hiring that position. Posting intensity is available by occupation, by job title, by company, and by region. Median posting duration shows the number of days a job posting is live and accepting applicants in your selected region, occupation, company, etc.

Top Companies Posting

This section lists the top companies posting for occupations that are mapped to the program in the selected region.

Top Posted Job Titles

This section lists the top job titles that employers are posting within the selected region.

In-Demand Skills

The in-demand skills section provides insight into the supply and demand of relevant skills by comparing the frequency of skills present in (1)5(1)5(s by c)-70m,3kg
